EIGHT GOOD REASONS TO INVEST IN A JABRA HEADSET SOLUTION

PRODUCTIVITY

Experience the freedom and increased efficiency from hands-free communication. With a headset you can continue working productively, while talking with both hands free. Complete multiple tasks quickly and easily, improving the speed of daily work.

DURABILITY

Choosing a high-quality Jabra headset gives you full reliability. It will not only save you in replacement costs, but you will also be spared downtime and repair hassles. Jabra headsets are built to last. Every headset is subject to extensive testing before launch, everything from cable flexing over boom arm rotations to acoustic tests. And our standards are as tough as our headsets.

COMFORT

Headsets with carefully adjusted acoustics, lightweight structures and ergonomic design plus a selection of wearing styles to match the needs of any user makes it easier and more comfortable to make and take calls at work. A headset provides comfort and helps to avoid aching muscles and neck strain from cradling the telephone handset between head and shoulder.

SOUND CLARITY

Experience consistently superior call sound clarity with Jabra headsets that incorporate the finest in acoustic technology. All headsets feature PeakStop™ technology. Combined with noise-canceling microphones this ensures that you hear and are heard clearly.

MOBILITY AND RANGE

Enjoy freedom of movement with our wireless headsets offering an unparalleled office range of up to 150 meters. Untie yourself from the limitations of traditional office telephones. Create a more efficient workspace where you can talk and still walk around effortlessly gathering information.

TALK TIME

All Jabra wireless headsets provide day-long talk time with the headset charging in the base between calls. All models in the Jabra GN9300e Series offer interchangeable batteries as an accessory, which enable unlimited talk time, keeping you connected around the clock.

SECURITY

All Jabra wireless office headsets digitally encrypt the signal between headset and base. This guarantees conversation confidentiality where you can talk freely, confident that the only people listening in are the ones you're talking to.

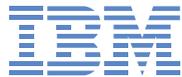

CONFERENCE CALLS

The Jabra GN9350e and the Jabra PRO™ 9470 offer the optimal solution for conference calling. Up to four people can take part in a wireless conference call by docking their headsets in the base of the caller, and continue to talk with clarity from anywhere in the office environment.

WHY JABRA HEADSET?

ALLIANCE PARTNERS

GN Netcom's Strategic Alliance programs ensure compatibility with Jabra headsets and office and contact center communication and collaboration products. By co-developing integrated solutions with Key Strategic Alliances, we deliver the best and most value-added user experience in the headset industry. This also provides access to the Alliance Partner's Sales & Marketing teams for integrated go to market initiatives. GN Netcom is an active member of the partner programs of the leading telephony providers including Aastra, Alcatel-Lucent, Avaya, Cisco, IBM, Microsoft, Nortel, Polycom and Siemens.

JABRA PC SUITE

STAY UPDATED AT ALL TIME

The Jabra PC Suite allows you to update your Jabra solution with the latest firmware. A firmware update will typically include new or improved functionality and error fixes. A firmware update is recommended if you experience problems with your Jabra device.

BE IN TOUCH WITH YOUR HEADSET

Jabra PC Suite includes a Control Center that allows you to manage and configure your Jabra headset from your PC.

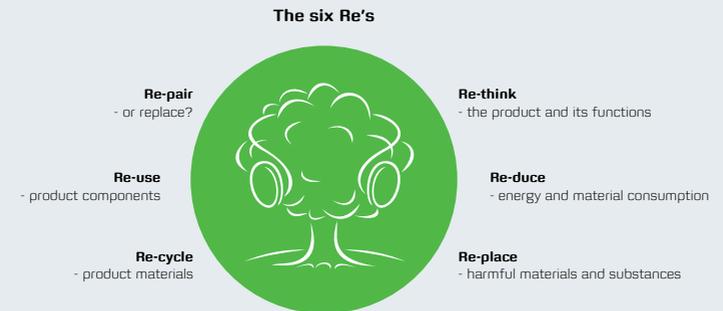

SOFTPHONES COMPATIBILITY

The Jabra PC Suite includes interfaces and drivers for a range of PC UC and softphones.

ECO DESIGN

Through the Jabra® brand, GN Netcom is a world leader in innovative headset solutions. Therefore it's natural to set standards when it comes to environmental responsibility as well. GN Netcom has introduced a Global Green Product Policy based on a 6-step approach; the new ecoDesign policy not only includes national regulatory environmental requirements that reduce or eliminate harmful materials, but also includes designing products for high recovery, recycle rates and reduced energy consumption. Our eco-friendly approach helps to reduce GN Netcom's carbon footprint and is summed up in:

AWARD-WINNING HEADSETS

As the innovative leader in headset solutions Jabra received Frost & Sullivan's prestigious 2009 Customer Value Enhancement Award in the Enterprise Headset Market World category. The award is presented each year to the company that has demonstrated excellence in implementing strategies that proactively create value for its customers with a focus on improving the return on the investment that customers make in its services or products.

Read more about Jabra headset awards at www.jabra.com

CHOOSE THE RIGHT HEADSET

To maximise the advantages of investing in a headset, potential users should consider individual staff requirements. It may be useful to use a variety of headsets in one company, for example, depending on the particular activity and the particular working environment and phone type involved. Four steps is all it takes to simplify the purchase decision and discover the best combination of headset option for you and your business.

WHERE DO YOU USE YOUR HEADSET?

DESK CENTRIC

DESK CENTRIC

Wants a headset primarily for use with traditional desk phone or PC softphone.

Desk centric – office professionals and contact center agents who spend most of the time in the office on the phone. Needs to work hands-free during calls to perform. Uses desk phone and/or PC softphone in the office. Products need to comply with the requirements of the traditional office user in terms of audio quality, durability and wearing comfort.

OFFICE CENTRIC

OFFICE CENTRIC

Wants a headset primarily for office use.

Corridor Warriors – professionals who spend more time in the office than on the road. They need to work around the office to perform. Uses the desk phone at the office along side with the mobile phone and occasionally PC softphone. Products need to comply with the requirements of the traditional office user in terms of audio quality, usability, wearing comfort and range.

MOBILE CENTRIC

MOBILE CENTRIC

Wants a headset primarily for mobile use.

Mobile Warriors – professionals spend more time on the road than in the office. They need to be able to work anywhere to perform. Uses the headset in the office as well as outside of the office, primary phone is the mobile phone. Products need to comply with the requirements of the advanced mobile user in terms of mobility, usability and design.

PHONE TYPE

COMMUNICATIONS MEDIUM INVOLVED

In order to secure your headset solution is integrated with your phone system please consider which connectivity needs you have. Feel free to contact your Jabra reseller for advice.

CONNECTION TO A TELEPHONE LAND LINE (DESK TELEPHONE)

Narrowband headsets. The headset can be connected to the telephone in several different ways.

CONNECTION TO A PC VIA USB

Headsets equipped with a USB plug can be connected to a PC very easily.

CONNECTION TO AN IP HARD PHONE (DESK TELEPHONE)

Wideband headsets are capable of direct connection to an IP telephone via a QD plug and support a frequency bandwidth from 150 to 6,800 Hz.

CONNECTION TO A MOBILE PHONE

These *Bluetooth*® headsets can be linked to a *Bluetooth*®-compatible mobile phone by wireless connection, enabling the user to take and finish calls directly on the headset.

SIMULTANEOUS CONNECTION TO SEVERAL END DEVICES

Some headsets can be connected to several different telephones simultaneously, enabling the user, for example, to accept calls to the landline over the mobile.

COMPLIANCE WITH UC SPECIFICATIONS

All models offer wideband audio and are equipped with an USB plug; most models offer special functions available via the UC provider.

NOISE

Office environments can be very quite. But more often they are noisy. Therefore Jabra has developed a range of microphones for professional users:

Omnidirectional for the fairly quite office. For the noisy environments noise cancelling, ultra noise cancelling to Noise Blackout™ microphones provide an effective shield against noise in the surroundings.

To get started consider the level of back ground noise in your office.

QUIET

Traditional, single-office environment with low to no back ground noise

MODERATELY NOISY

Shared office or open office environment where back ground noise is present

NOISY

Very noise environments typically customer services or contact center environments where back ground noise will interfere with your calls

Most Jabra Series come with more than one microphone type. In the following the best noise-cancelling option is indicated. For full overview go to page 27.

MONO / DUO

WANT SOUND IN ONE OR BOTH EARS?

Do you want to listen to sound through one ear or two?

Do you want stereo sound, or is mono sufficient?

SOUND IN ONE EAR - MONO

- Ideal if you like to be aware of what's going on around you during a phone call

SOUND IN BOTH EARS - DUO

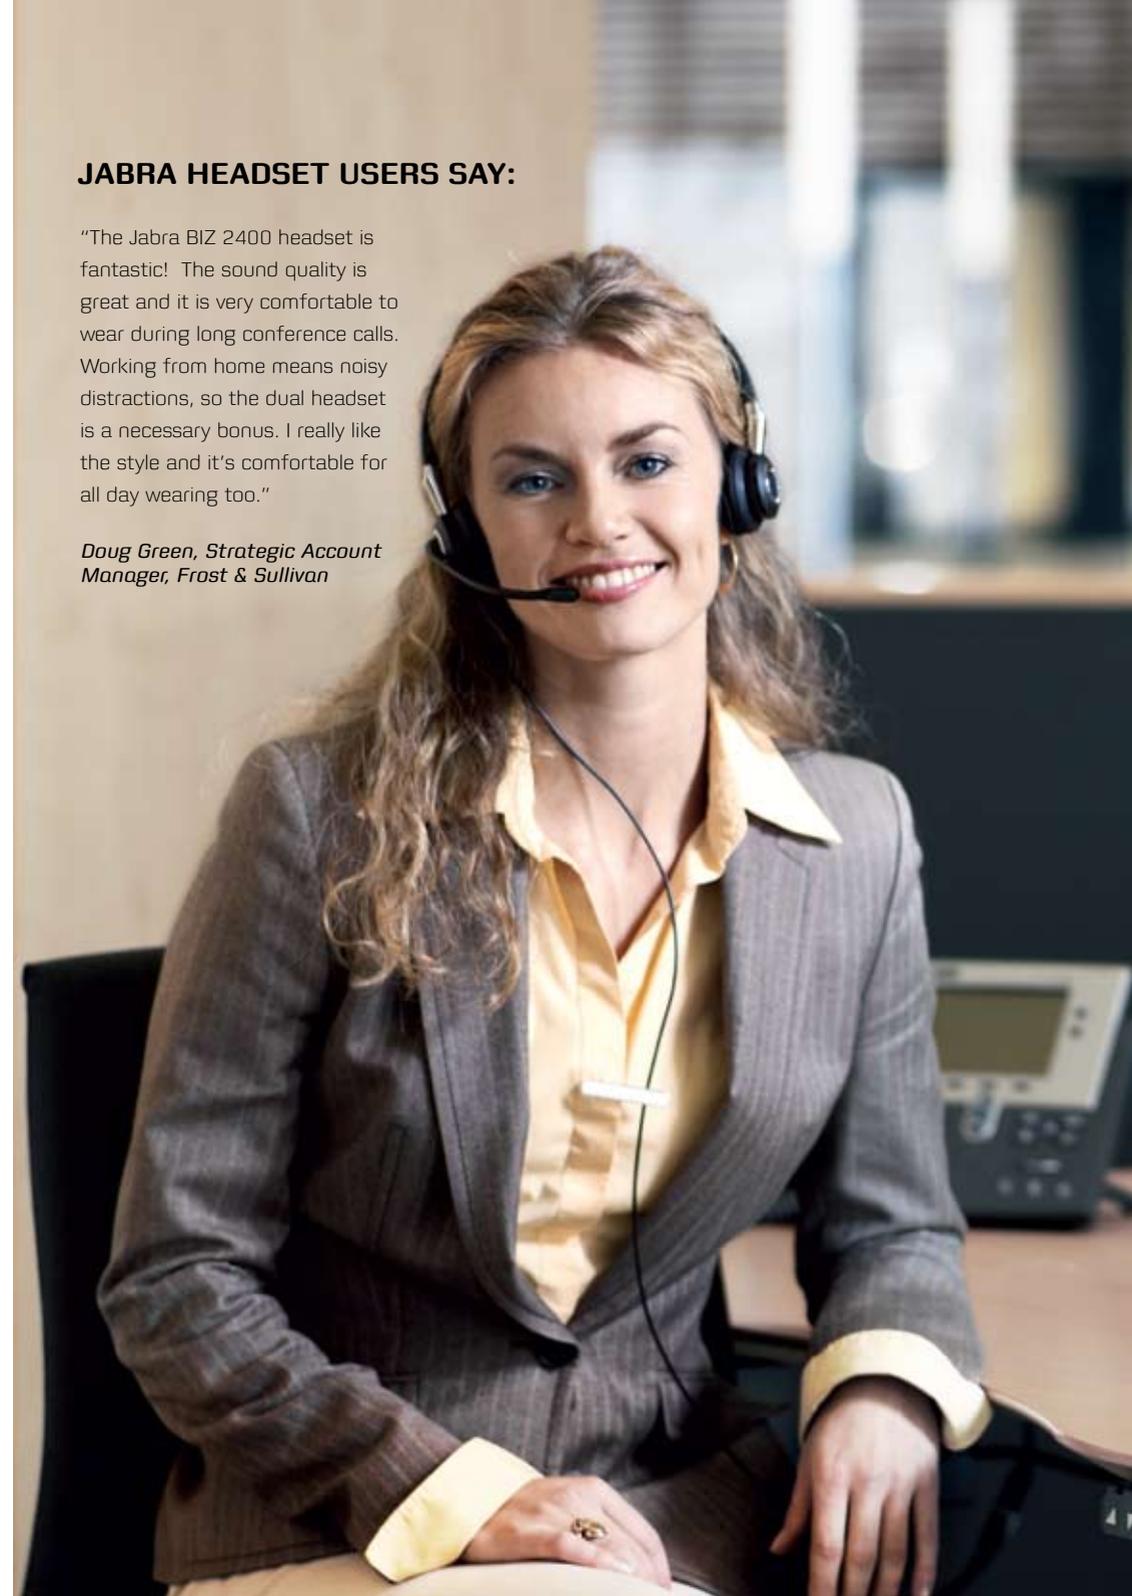

- Ideal if you only want to hear the caller's voice and want to close out surrounding noise

JABRA HEADSET USERS SAY:

"The Jabra BIZ 2400 headset is fantastic! The sound quality is great and it is very comfortable to wear during long conference calls. Working from home means noisy distractions, so the dual headset is a necessary bonus. I really like the style and it's comfortable for all day wearing too."

Doug Green, Strategic Account Manager, Frost & Sullivan

JABRA M5390 USB

REMOTE CALL CONTROL

To get remote call control you either need a EHS cable or a mechanical Jabra GN1000 solution. With a Jabra GN1000 you are able to answer and end calls.

The EHS adapter allows you to:

- Hear ring tones
- Answer and end calls (up to 150 meters away from your desk)
- Adjust the volume
- Mute the call

JABRA GN1000 SERIES

JABRA PRO 9400 SERIES USER SAYS:

"Really cool looking, believe it or not, that goes a long way. It also offers a lot of functionality in terms of the triple connectivity. The really neat thing is the little user interface. A screen is a plus because no headsets has that. It literally will tell you what you are connected to."

Danny Hayasaka, Sales Manager, CallOne
